Maintain sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below TLVs. Individual protection measures, such as personal protective equipment:

**General information:**

Good general ventilation (typically 10 air exchanges per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. An eye wash and safety shower must be available in the immediate work area.

**Eye/face protection:**

Wear safety glasses with side shields (or goggles).

**Skin Protection:**

Hand: Chemical resistant gloves.

Other: Wear suitable protective clothing

**Respiratory protection:**

In case of inadequate ventilation use suitable respirator. Chemical respirator with organic vapour cartridge, full facepiece, dust and mist filter.

**Hygiene measures:**

Provide eyewash station and safety shower. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Avoid contact with eyes, skin and clothing.
